All-America Winners and Novelties

Zinnia, Peppermint Stick

ZINNIA, Peppermint Stick

UNLIKE ANY ZINNIA ON THE MARKET TODAY.

Peppermint Stick has a much wider color range (red and white, red and yellow, pink and white, orange and yellow, purple and white) than its parents, Old Glory and The Clown. Plants somewhat taller than Pumila bear medium-type flowers. One of the best cut-and-come-again in Zinnias, blooms will be produced until frost if kept picked. An early strain, extensively reselected, Peppermint Stick produces approximately 70% striped flowers.

Pkt. 25c, large pkt. 75c, ¼ oz. \$1.00.

New Giant ZINNIAS Burpee's Hybrids

This new giant-flowered Zinnia is the loveliest ever created, immense fluffy and ruffled flowers with graceful curved petals like those in a giant Mum. This Zinnia comes in a gorgeous range of colors and color combinations larger than Dahlia flowered and most desirable for garden use and cutting.

Pkt. 25c, large pkt. 75c, ¼ oz. \$1.40.

ZINNIA, "Persian Carpet"

All-America Selection Winner. Like tiny

Dahlias, each with its pointed petals tipped with contrast, these perfect miniature Zinnias make the ideal garden edging subject. Dwarf plants begin blooming early; grow into tidy, well-behaved 12-inch mounds of brilliant color, each plant different. Pick dozens of flowers, no two alike (yes, they do have cutting stems, and dainty foliage quite unlike most Zinnias). The variegated flowers, each the size of a silver dollar, fit uniquely in the modern house.

Pkt. 25c, large pkt. 75c, ¼ oz. \$1.25.

CELOSIA PLUMOSA, New Golden Fleece

1953 Novelty

Looking for something really unusual? Here's an annual that will stand any amount of hot weather, laughs at pests and diseases and will cut-and-come again all summer long. No, it's not a Zinnia but a new giant form of Ostrich Plume or Feathered Cockscomb called Golden Fleece. Plumes are huge and dense, on long cutting stems, dozens of them to the plant—a florist's cut flower as well as a showy border plant.

Pkt. 25c; large pkt. 60c; ¼ oz. \$1.00.

DAHLIA, Unwin's All-Double Dwarf Hybrids Michell Introduction

A new strain which will produce 100% all-double flowers and in a very wide range of selected colors. This is an excellent cut-flower variety; also makes a fine item for pot plants.

Pkt. 25c, large pkt. \$1.00.

MARIGOLD, Color Magic

Pkt. 25c; large pkt. 60c; ¼ oz. \$1.25.

Zinnia,
Persian Carpet

During our sixty-two years of service to American garden lovers, we have always maintained a reputation for seed of superior quality. The success of our many customers in growing superior plants has strengthened our conviction that we shall supply only those varieties and strains of finest quality.

In the pages that follow, all of our Flower Seeds are arranged alphabetically. The annuals, biennials, and perennials are carefully marked.

ANNUALS. These grow to maturity, bloom, ripen their seed, and die the same year. Asters, Poppies, Sweet Peas, Morning Glories, and Zinnias are typical examples.

BIENNIALS. These are raised from seed started in early summer, flowering the second year, after which they die. Typical examples are Pansies, English Daisies, and Canterbury Bells.

PERENNIALS. These plants live on from year to year, increasing in size and in beauty with age. Typical examples are Aquilegia, Delphinium, and Hardy Phlox. Many Perennials may be grown from seed, which is usually planted outdoors from June to September.

How to Sow Double Petunia Seed

The seed of Double Petunia is very fine and should be sown inside in flats or pots, using a mixture of finely sifted soil, with the addition of some sand. Thoroughly water the soil and then lightly scatter the seed on the surface. Do not cover the seed with soil. The receptacle should be covered with a sheet of glass, and kept in a warm location until the seedlings start to grow. It is important not to discard the small seedlings, as these usually produce the best double flowers.

Spade or plow the soil 1 to 1½ feet deep; fertilize with manure or Hyper-Humus; scatter about ¼ pound of bonemeal around each hill when planting. If soil is very heavy, incorporate a liberal quantity of granulated peat moss. About August 1, apply about ½ pound bonemeal to each plant and work in thoroughly; sheep manure or Potato fertilizer can be substituted for bonemeal at this time to good advantage.

GLADIOLUS-*In Captivating Shades*

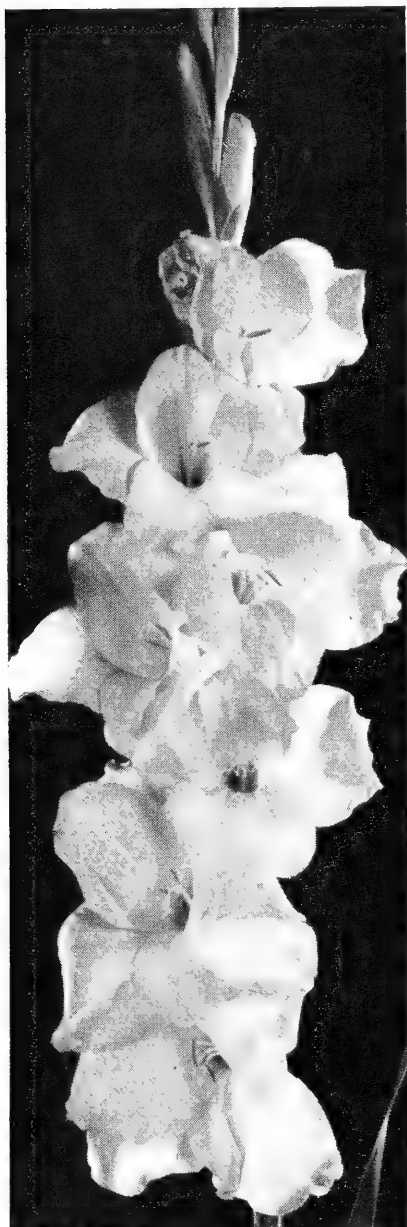

There is no other summer-flowering bulb that is enjoying so great popularity as the Gladiolus. Their adaptability to garden decoration or to use as cut flowers during the summer and early autumn is surpassed by no other flower. They are not only showy in the garden, but when cut with the first flower open will last for ten days in the house. While they thrive in almost any good garden soil, better results may be had if soil is well prepared and enriched with some of our pulverized manures. Plant bulbs 4 to 6 inches deep and from 4 to 6 inches apart.

The small white flowers come in large trusses along stout arching canes, followed by red fruits relished by the birds. In its place this makes a fast-growing, impenetrable barrier, but it should be confined to places where it can be left to grow as it pleases. Plant 12 inches apart.
